PROFILE

Motivated Premier University student with a growing foundation in front-end web development. Hands-on experience building and publishing a responsive personal portfolio with an owner dashboard and cloud-backed content management. Curious, consistent, and eager to contribute while developing practical software skills.

PROJECTS

Personal Portfolio Website

Responsive portfolio published with GitHub Pages

- Built a responsive, mobile-friendly portfolio using semantic HTML, CSS, and JavaScript.
- Created structured sections for profile, education, projects, skills, certificates, and contact information.
- Applied accessible navigation, smooth scrolling, reveal animations, and a consistent technical visual system.

Portfolio Owner Dashboard

Content and file management interface

- Developed an authenticated dashboard for updating the profile image, projects, and certificates.
- Connected Supabase for authentication, database records, and public file storage.
- Added create, edit, delete, and upload workflows for portfolio content.

SKILLS

Web	HTML5, CSS3, JavaScript, responsive design
Backend services	Supabase authentication, database, and storage
Tools	Git, GitHub, GitHub Pages, browser developer tools
Strengths	Continuous learning, problem solving, attention to detail
