PROFILE

Computer Science and Engineering student with practical experience in Python, Java, C++, and front-end web development. Built and published a responsive portfolio with an authenticated, cloud-backed owner dashboard. Completed professional courses in artificial intelligence, machine learning, cybersecurity, critical thinking, and Python web frameworks. Seeking internships and collaborative software projects.

PROJECTS

Personal Portfolio Website

Responsive portfolio published with GitHub Pages

- Built a responsive, mobile-friendly portfolio using semantic HTML, CSS, and JavaScript.
- Created structured sections for profile, education, projects, skills, certificates, and contact information.
- Applied accessible navigation, smooth scrolling, reveal animations, and a consistent technical visual system.

Portfolio Owner Dashboard

Content and file management interface

- Developed an authenticated dashboard for updating the profile image, projects, and certificates.
- Connected Supabase for authentication, database records, and public file storage.
- Added create, edit, delete, and upload workflows for portfolio content.

SKILLS

Languages	Python, Java, C++, JavaScript
Web development	HTML5, CSS3, JavaScript, Django, Flask, responsive design
Backend services	Supabase authentication, database, and storage
Tools	Git, GitHub, GitHub Pages, browser developer tools
Strengths	Continuous learning, problem solving, attention to detail

CERTIFICATIONS

- Introduction to Modern AI - Cisco Networking Academy (2026)
- Intro to Machine Learning - Kaggle (2026)
- Getting Started with Cybersecurity - IBM SkillsBuild (2026)
- Critical Thinking in the AI Era - HP LIFE (2026)
- Python Programming with Web Frameworks (Django & Flask) - New Vision Information Technology Limited (NVIT), 2026

EDUCATION

B.Sc. in Computer Science and Engineering (CSE)

Premier University, Chattogram - ongoing

ADDITIONAL INFORMATION

Languages: Bengali and English | Availability: Open to internships, learning opportunities, and collaborative projects
